Failure to follow all instructions listed below may result in electric shock, fire and/or serious personal injury. SAVE THESE INSTRUCTIONS WORK AREA SAFETY: • Keep your work area clean and well lit. Cluttered benches and dark areas invite accidents. • Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases, or dust. Power tools create sparks which may ignite the dust or fumes. • Keep bystanders, children, and visitors away while operating a power tool. Distractions can cause you to lose control. ELECTRICAL SAFETY • Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs in any earthed (grounded) power tools. Double insulated tools are equipped with a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install a polarized outlet. Do not change the plug in any way. Double insulation eliminates the need for the three wire grounded power cord and grounded power supply system. • Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock. • Avoid body contact with earthed or grounded surfaces such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is grounded. • Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat. Oil, sharp edges or moving parts. Damaged cords increase the risk of electric shock. • When operating a power tools outside, use an extension cord suitable for outdoor use. These cords are rated for outdoor use and reduce the risk of electric shock. • Do not use AC only rated tools with a DC power supply. While the tool may appear to work. The electrical components of the AC rated tool are likely to fail and rate a hazard to the operator. PERSONAL SAFETY • Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use tool while tired or under the influence of drugs, alcohol, or medication. A moment of inattention while operating power tools may result in serious personal injury • Use safety equipment. Always wear eye protection. Safety equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection for appropriate conditions will reduce personal injuries. • Dress properly. Do not wear loose clothing or jewelry. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewelry or long hair can be caught in moving parts. Air vents may cover moving parts and should be avoided. • Avoid accidental starting. Ensure the switch is in the off position before plugging in. Carrying power tool with your finger on the switch or plugging in power tools that have the switch on invites accidents. • Remove any adjusting keys or wrenches before turning the power tool on. A wrench or key that is left attached to a rotating part of the tool may result in personal injury. • Do not overreach. Maintaining proper footing and balance at all times. Loss of balance can cause an injury in unexpected situation. • If devices are provided for connection of dust extraction and collection facilities, ensure these are connected and properly used. use of these devices can reduce dust related hazards. • Do not use a ladder or unstable support. Stable footing on a solid surface enables better control of the tool in unexpected situations. • Keep tool handles dry, clean and free from oil and grease. Slippery handles cannot safely control the tool. TOOL USE AND CARE • Secure the work piece. use clamp or other practical way to hold the work piece to a stable platform. Holding the work piece by hand or against your body is unstable and may lead to loss of control. Downloaded from www.Manualslib.com manuals search engine ng lis h 10" Compound Laser Miter Saw Operator's Manual GMS15LB • Do not force the power tool. The tool will perform the job better and safer at the feed rate for which it is designed. Forcing the tool could possible damage the tool and may result in personal injury. • Use the correct power tool for the job. Don't force the tool or attachment to do a job for which it is not designed. • Do not use tool if switch does not turn it on or off. Any tool that cannot be controlled with the switch is dangerous and must be repaired or replaced by an authorized service center. • Turn power tool off, and disconnect the plug from the power source and/or battery pack from the power tool before making any adjustments, changing the accessories, or storing the tools. Such preventive safety measure reduce the risk of an accidental start up which may cause personal injury. • Store idle tool out of reach of children and other inexperienced persons. It is dangerous in the hand of untrained users. • Maintain power tools with care. Check for proper alignment and binding of moving parts, component breaks, and any other conditions that may affect the tool's operation. A guard or any other part that is damaged must be properly repaired or replaced by an authorized service center to avoid risk of personal injury. • Use recommended accessories. using accessories and attachments not recommended by the manufacturer or intended for use on this type tool may cause damage to the tool or result in personal injury to the user. Consult the operator's manual for recommended accessories. • Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control. • Feed the work piece in the correct direction and speed. Feed the work piece into a blade, cutter, or abrasive surface against the direction of the cutting tool's direction of rotation only. Incorrectly feeding the work piece in the same direction may cause the work piece to be thrown out at high speed. • Never leave the tool running unattended, turn the power off. Do not leave the tool until it comes to a complete stop. • Never start the power tool when any rotating component is in contact with the work piece. WARNING: USE OF THIS TOOL CAN gEnErATE AnD DISBUrSE DUST Or OTHER AirBOrne PARTICLES, INCLUDING WOOD DUST, CrYSTAllInE SILICA DUST AnD ASBESTOS. Direct particles away from face and body. Always operate tool in a well-ventilated area and provide for proper dust removal. Use dust collection system wherever possible. Exposure to the dust may cause serious and permanent respiratory or other injury, including silicosis (a serious lung disease), cancer, and death. Avoid breathing the dust, and avoid prolonged contact with the dust. Allowing dust to get into your mouth or eyes, or lay on your skin may promote absorption of harmful material. Always use properly fitting NIOSH/OSHA approved respiratory protection appropriate for dust exposure, and wash exposed areas with soap and water. SERVICE • Have Your Power Tool Serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained. • Service Your Power Tool periodically. When cleaning a tool, be careful not to disassemble any portion of the tool since internal wires may be misplaced or pinched or safety guard return spring may be improperly installed.
